## Product Description

The LS 1200 Four Light Bracket for the Light Storm LS 1200d Pro allows users to mount up to four LS 1200d Pros<sup>1</sup> or other fixtures with Junior Mounting Pins onto a single heavy-duty aluminum frame, unleashing up to 4800W of directional daylight-balanced light.

In addition to panning and tilting the whole fixture with the dual heavy-duty rosette locks, the 4 junior pin receivers grant independent pan-tilt adjustment to each lamp head, allowing users to achieve a wider spread of light or a high-intensity push in a single direction.

<sup>1</sup> LS 1200d Pro sold separately.

## Target Audience

The LS 1200 Four Light Bracket is ideal for filmmakers and lighting technicians who want to combine and operate four high-output LED fixtures, such as the Light Storm 1200d Pro fixtures, on a single frame for an ultra-high-powered lighting setup.

By consolidating four LS 1200d Pro fixtures onto a single stand or rigging point, users can conserve valuable space on set, particularly when needing to position multiple high-output fixtures high up in the air.

The LS 1200 Four Light Bracket's heavy-duty aluminum frame with a 28mm / 1.125in junior mounting pin results in a robust and dense package, making it ideal for users who are accustomed to large stands and rigging tools.
